Celebrating Our 80th Anniversary!

Wow! It's been 80 years!

We would like to thank you for making the last 80 years possible.

Our journey began December 1938 when 900 machinery manufacturers in Tokyo invested in "Tokyo JUKI Manufacturers Association." In 1947, JUKI introduced the first home sewing machine. In 1953 JUKI began the sale of industrial sewing machines.

From our very first days in business, we at JUKI Corporation have striven to create new values through "Monodzukuri" (the art of product-making) and the ongoing invention and evolution of technologies. Today we are strongly advancing business reforms on every operational front, from development and manufacture to sales and marketing. Our goal is to thrive in the 21st century as a strong global enterprise.

We are very proud to have an outstanding team and community. We are excited to see what is in store for JUKI this decade!

With JUKI's new presser feet for longarm and midarm machines!

Open Toe Foot

This presser foot for free-motion sewing is open at the front so that the needle area is easy to see. It is useful for quilting small designs or when the needle area needs to be visible.

For TL-2200QVP and TL-2200QVP S

Couching Foot

This presser foot is used for sewing decorative thread, yarn, and much more. This set includes two different sizes of couching foot. Use the appropriate one according to the thickness of the material being sewn.

For TL-2200QVP, TL-2200QVP S, and J-150QVP

Glide Foot

The glide foot is a bowl-shaped type foot intended to be used for quilting when gliding along applique and other slightly three-dimensional embellishment. The glide foot is an exclusive foot for the high-shank type model, TL-2200QVP longarm.

For TL-2200QVP, TL-2200QVP S, and J-150QVP
